EXPERIENCE

PowerON Services

Computer and mobile device refurbishment company

📍 Roseville, California

Linux Systems Administrator

📅 September 2020 - Current

- Network and server administration as well as desktop support for our departments; our environment consists of Windows domain controllers, clustered VMWare hypervisors, Linux web and database servers and Cisco networking equipment
- Creation and maintenance of infrastructure that erases customer data from a wide range of devices, collects all relevant system information and deploys them for testing
- Experience with automation and eliminating single points of failure in order to improve the robustness of critical systems
- Improving business processes and creating scripts to automate tasks and increase the efficiency of our departments
- Serving as a site admin for IT managed services including GitHub, Jira, Confluence, Active Directory, and Google Suite

Acting IT Manager

📅 June 2021 - July 2021

- Interviewing and training new IT associate to support our current systems

PowerON Services through Silicon Valley Staffing

IT Associate

📅 February 2020 - September 2020

- Responsible for setting up accounts for new hires and managing access to company resources through Active Directory and Google Workspace
- Responsible for addressing any issues affecting our production departments
